STUDIOS

So what's this about?

AdaQuest is an NFT Game Project powered by the Cardano Blockchain. It is community driven and will play in the fictional world of Ada.

It is planned to roll out the project in 3 Phases:

Phase 1
Q1 2022

Mobile Game
Duel Mode

→

Phase 2
2023

Tactical Coop
Dungeon Crawler

→

Phase 3
in the far future

Skirmish
Battlefield Mode

Game Phase 1

This is what we currently focussing on. A mobile web-based game, where players can battle each other or NPCs in a 1on1 duel mode.

This will mainly consist of creating a character, equip him, gain levels and try out the mechanics in short fights. Later on we will add hand crafted dungeons to explore and dive deeper into the lore.

The game will be easy to play, but hard to master, as we allow a wide range of combinations of items, abilities, gadgets and stats points.

We're planning to release teh first Alpha in Q1 2022.

Did I hear "NFT" ?

Yes. But don't worry, we won't sell you pictures of apes. Each of our NFTs is not only hand-crafted by an artist with detailed artwork it also can be used in every Phase of the game.

This gives the NFT owner an actual usecase and us a way to finance the project and pay the artists.

Primis Flammae
Virga

Mage   23 / 500

| +5% | -2% | 0% | -3% |

Gleaming Sword
Shatter

Dagger   1 / 2000

| +6% | +5% | +4% | -5% |

Destiny Cards

These are the starting template for your character. They determine your base stats and come with their own exclusive set of abilities, that can be used in fights.

Item Cards

These will be equipped on your character and can also have abilities that trigger during a fight. Each NFT item will have the chance for a randomized appearance.

ⓘ Each of our NFTs will be **unique** - meaning it's combination of attributes and modifiers will be on no other card. Each series of items or destinies will also be hard-capped. If they are gone, they are gone.

Isn't this pay2win?

No - and we will tell you why:
All of our NFTs have the same power level. If an attribute is higher, another one will be lower. We programmed an item generator that will attach values to each item that will balance each other out.
Cards that are more rare and expensive, will have more extreme specialization and more sophistacated abilities, but they will come with a downside.

So it's pay2play?

No. We don't want to segregate the community. That's why you will be able to play the game without owning any NFT. We created over 30 items, 20 gadgets and 2 free starter destinies that are free for everyone by just playing the game.
Players who enjoy the experience and want to try out other destinies and items can buy our NFTs and finance the project that way.

Some of the gadgets you can use in the game.

So where do I get these NFTs?

You can buy our NFTs on our own Marketplace on the website and in the future on some third party NFT platforms (where you can also sell them).

Or you can loot them in the game.

Yes, we will reserve a portion of each item series excusively for ingame drops. If you find one of the NFT items, you only need to pay the Cardano Network minting fee and it wil lbe transferred to your wallet and you can equip or sell them.

Gotcha, so it's play2earn. Right?

You could call it that, but we have no ingame tradeable ingame token.We pay players for grinding through the same level 20 times each day or allow them to pay advantages inside of the game with that.

The Value will be generated by collecting and trading rare NFTs items.

This said, there will be a token outside of the game, to support the project and reward the community.

The Quest Token

These tokens will be distributed to every member of the Quest Staking Pool each epoch.
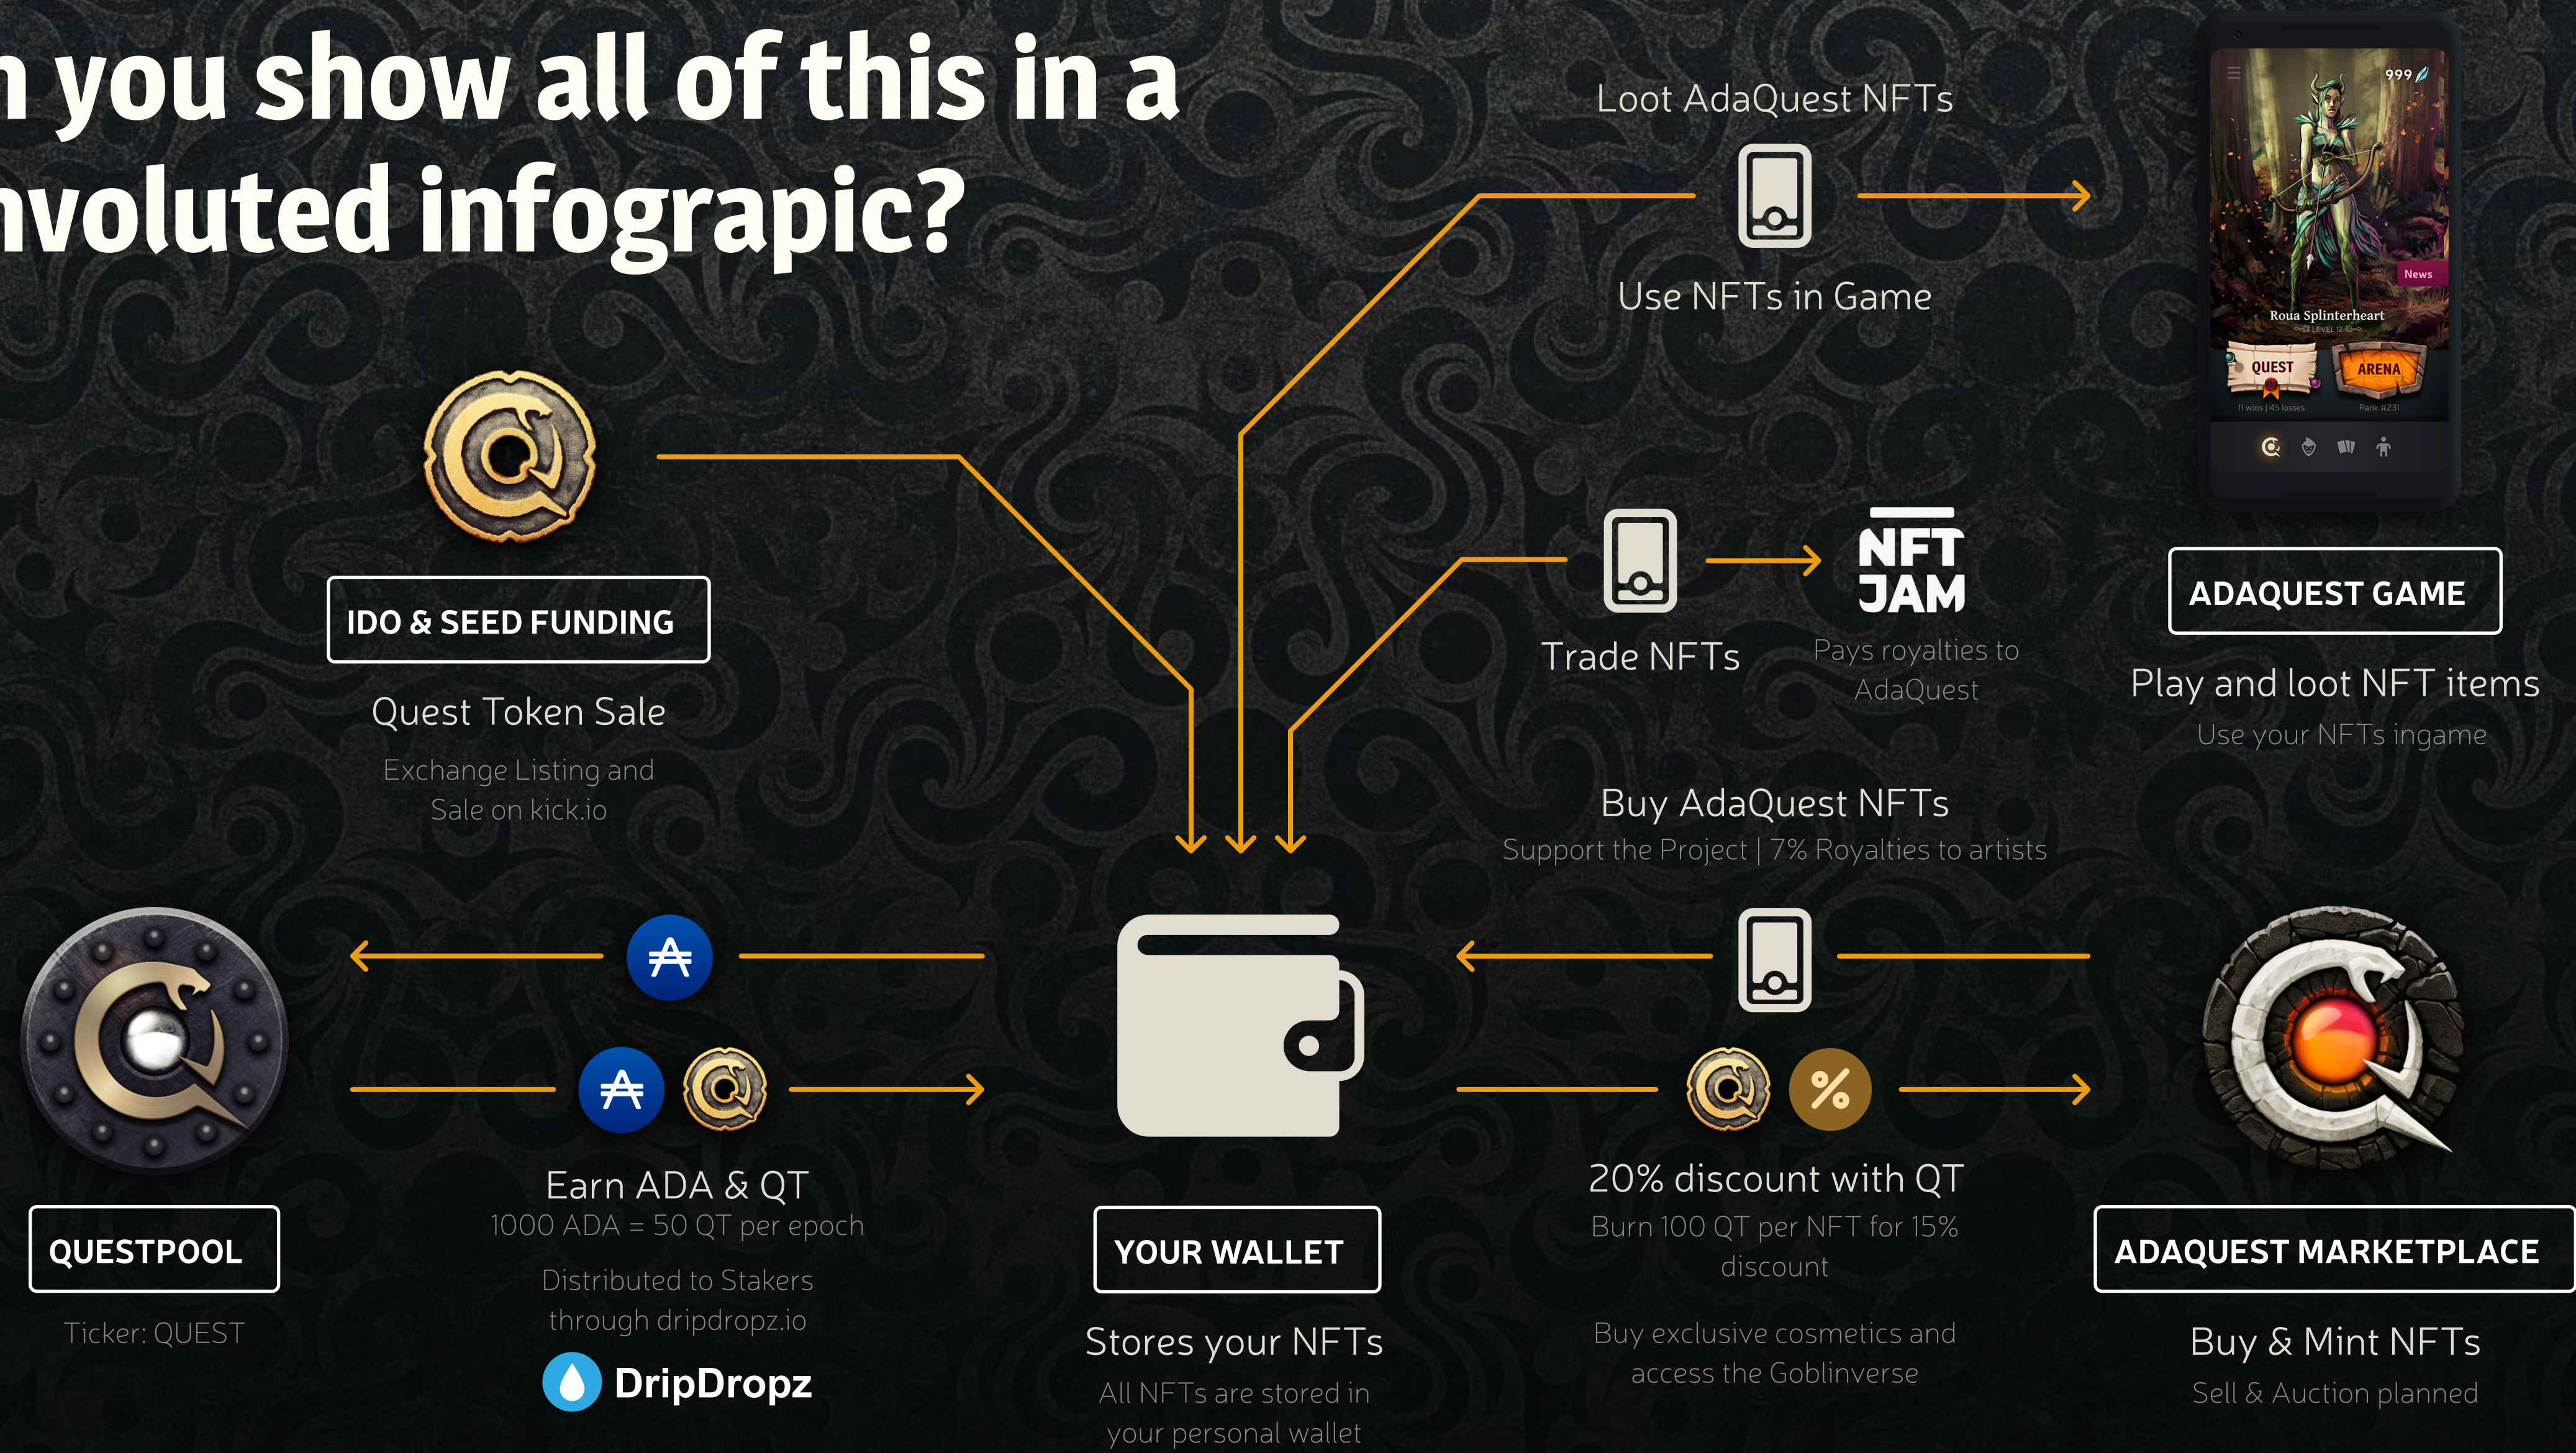

20% discount on NFT purchases by trading in QTs

Can be used to buy exclusive NFTs and unlock cosmetics

Access to Goblinverse

Can you show all of this in a convoluted infograpic?

Yes.
